

LIMIT SWITCHES & SENSORS

Power Mechanical are delighted to announce that we have closed a formal OEM agreement with Westlock Controls.

The agreement supports Power Mechanical's focus on the designing and building of high integrity valve automation packages for the Oil and Gas Sectors as well as holding stock of Westlock product to support local industry customers.

Managing Director Paolo Moretti commented *"Westlock Controls are global leaders and innovators for monitoring and controlling of High Integrity and Emergency Shut Down valve applications. Power Mechanical's long-standing relationship with Westlock makes this a great fit for us both"*.

Regional Sales Manager Karl Charvat added *"Power Mechanical offer considerable technical knowledge and experience in providing high integrity equipment into the Oil & Gas industry backed by their service expertise means they can offer detailed technical support in-house and on site, and we are delighted to be working with them"*

Power Mechanical's stock profile has been specifically configured to support UK offshore and onshore operators as well as the UK's gas transmission networks.

- Retrofitting services supporting upgrading of old and out of spec equipment on all valve applications.
- Dedicated service team offering simple and effective turn-key solutions to installed valves both onshore and offshore.
